The posting of October tuition remission will be delayed. Tuition remission for October & November (including corrections and retroactive changes that would post with the October run) will post with the close of the November Ledger.

Delays caused by UAW BR/BX contract implementation pushed out critical software development work to remediate tuition remission posting, which pushed back configuration updates required for the current process. This is a one-time exception; configuration changes to the reports required to calculate remission totals for distribution in the current process will be in place before the close of the November ledger. Future remediation of the current-state process will flow through enterprise payroll software, reducing the manual process and coupling benefits posting with gross payroll.

For assistance with tuition remission, please submit a ticket to Services & Support using the drop-down options below. Please include the EID (Employee ID) and PID (Personal Identification Number - i.e. student ID), as well as any screen shots or financial reports, when submitting a ticket.
